"We can do hard things."

June 8, 2023

Dear St. Stanislaus Kostka Families,

It is hard to believe we are completing our last full week of school for the 2022-2023 school year! Next week we have three 11:50 AM dismissal days, and there is **no After Care on June 14**. Below please find the remaining important dates for this school year.

- ✓ June 12 – PreK Graduation 9:30 AM
Kindergarten Graduation 12:30 PM
11:50 AM dismissal
- ✓ June 13 – Last day for non-returning students
- ✓ June 14 – Moving Up Day for students going into Grades 1-8/**11:50 AM dismissal**/NO AFTERCARE
- ✓ June 14 – Mandatory meeting for all carnival workers 7 PM/cafeteria
- ✓ June 22- 24 – St. Stanislaus Kostka Carnival

Please remember, any families not returning for the 2023-2024 school year need to let the office know where to forward transcripts by tomorrow, **June 9**. The last day of school for non-returning students is **June 13**. If you have any questions, please contact the school office.

All summer bridgework will be available on our school website home page following the last day of school. Teachers will review supply lists and summer work on Moving-Up Day. There will be PreK and Kindergarten Orientation on **Sept. 5**.

Please keep our PreK and Kindergarten classes in your prayers as they prepare for their commencement events next week. Our littlest learners are ready to move on and we are so proud of them!

Warmest regards,

Lori Hodder
Principal

Actions to protect health on poor air quality days

Poor air quality can result from presence of particulate matter due to wildfires

- Sensitive populations (which includes the elderly, infants and young children, people with lung diseases such as asthma, chronic obstructive pulmonary disease (COPD), emphysema or chronic bronchitis) should remain indoors.
 - Individuals with asthma: Poor air quality may trigger asthma attacks.
 - Individuals with respiratory diseases: Follow physician's recommendations and respiratory management plan.
- People in general should avoid strenuous activities and limit the amount of time they are active outdoors.
- For people who work outdoors or need to be outside:
 - Take more breaks indoors if possible
 - Shorten the length and intensity of any physical activity
- The most effective way to prevent breathing harmful particles from wildfire smoke is to stay indoors with windows and doors closed.
- If an air conditioner is available, run it while keeping the fresh-air intake closed and the filter clean to prevent outdoor smoke from getting inside.
- When outdoor air quality is poor, do not use candles and fireplaces which could add to indoor air pollution. Do not vacuum, because vacuuming stirs up particles already inside your home. Do not smoke tobacco or other products, because smoking puts even more pollution into the air.
- Do not rely on dust masks for protection. Paper “comfort” or “dust” masks commonly found at hardware stores trap large particles, such as sawdust. These masks will not protect your lungs from smoke. People who must be outside can have some protection from an N95 mask if worn properly.

St. Stan's Carnival

JUNE 22-24, 2023
